

/users

POST /users/login

功能

登录使用接口

接口

```
1 POST /users/login
2 "Content-Type": "application/json"
3 {
4     userId: "userId",
5     password: "password"
6 }
```

响应

- 成功 (200 OK)

```
1 {
2     userName: "name",
3     userId: "id",
4     token: "token"
5 }
```

- 失败 (401 Unauthorized)

```
1 {
2 }
```

GET /users/:id

功能

获取用户信息接口

接口

```
1 GET /users/:id
2 "Content-Type": "application/json"
3 "Authorization": "Bearer token"
```

响应

- 成功 (200 OK)

```
1  {
2      "name": "name",
3      "avatar": "https://...",
4      "email": "email"
5  }
```

- 验证失败 (401 Unauthorized)
- 信息不存在 (404 Not Found)

/doc

GET /doc

接口

```
1  GET /doc
2  "Content-Type": "application/json"
```

响应

- 成功 (200 OK)

```
1  {
2      "docList": [
3          {
4              "id": " id",
5              "name": "name",
6              "summary": "sum",
7              "img": "https:....."
8          }
9      ]
10 }
```

- 失败 (404 Not Found)

GET /doc/:d_id

接口

```
1  GET /doc/:d_id
2  "Content-Type": "application/json"
```

响应

- 成功 (200 OK)

```
1  {
2      "docInfo":{
3          "id": " id",
4          "name": "name",
5          "summary": "sum",
6          "img": "https:....."
7      },
8      "docDir":[
9          {
10             "id":"id",
11             "name":"name"
12         },
13     ]
14 }
```

- 失败 (404 Not Found)

GET /doc/:d_id/:c_id

接口

```
1  GET /doc/:d_id/:c_id
2  "Content-Type": "application/json"
```

响应

- 成功 (200 OK)

```
1  {
2      "d_id":"id",
3      "c_id":"id",
4      "title":"titile",
5      "content":"content"
6  }
```

/aichatdoc

GET /aichatdoc/:id

接口

```
1  GET //aichatdoc/:id
2  "Authorization": "Bearer token"
```

响应

- 成功 (200 OK)

```
1  {
2    "id": "",
3    "chat": [
4      {
5        "id": "",
6        "ask": "",
7        "ans": "",
8      }
9    ]
10 }
```

GET /aichatdoc/?u_id=

接口

```
1  GET //aichatdoc/?u_id=
2  "Authorization": "Bearer token"
```

响应

- 成功 (200 OK)

```
1  {
2    "id": "",
3    "u_id": "",
4    "chat": [
5      {
6        "id": "",
7        "ask": "",
8        "ans": "",
9      }
10   ]
11 }
```

POST /aichatdoc/:id

描述

在指定id的对话创建询问

接口

```
1 POST /aichatdoc/:id
2 "Content-Type": "application/json"
3 "Authorization": "Bearer token"
4 {
5     "ask": "",
6     "u_id": ""
7 }
```

响应

- 成功 (200 OK)

流式返回

POST /aichatdoc/new

描述

创建一个新的对话

接口

```
1 POST /aichatdoc/
2 "Content-Type": "application/json"
3 "Authorization": "Bearer token"
4 {
5     "u_id": ""
6 }
```

响应

- 成功 (200 OK)

```
1 {
2     id="",
3 }
```

/project

GET /project/?u_id=""

描述

获取项目列表（可加筛选条件，指定用户）。

接口

```
1 GET /project/?u_id=""
2 "Content-Type": "application/json"
3 "Authorization": "Bearer token"
```

响应

- 成功 (200 OK)

```
1 {
2     list:[
3         {
4             "name": "",
5             "id": ""
6         }
7     ]
8 }
```

POST /project/

描述

创建新项目

接口

```
1 POST /project/
2 "Content-Type": "application/json"
3 "Authorization": "Bearer token"
4 {
5     "uId": "",
6     "name": "",
7     "url": "",
8 }
```

响应

- 成功 (200 OK)

```
1 {
2     "id": "",
3 }
```

GET /project/:id

描述

获取指定id项目的信息

接口

```
1 POST /project/:id
2 "Content-Type": "application/json"
3 "Authorization": "Bearer token"
```

响应

- 成功 (200 OK)

```
1 {
2   "id": "",
3   "name": "",
4   "path": {
5     "folders": [
6       {
7         "name": "",
8         "folders": [],
9         "files": [],
10        },
11      ],
12      "files": ["name1", "name2"],
13    }
14 }
```

POST /project/:id/

描述

获取指定id项目的指定文件（fileName为带路径的文件名（如：/src/main.cpp））

接口

```
1 POST /project/:id/:fileName
2 "Content-Type": "application/json"
3 "Authorization": "Bearer token"
4 {
5   fileName: ""
6 }
```

响应

- 成功 (200 OK)

```
1 {  
2   "fileName": "",  
3   "file": ""  
4 }
```

GET /project/delet/:id

描述

删除指定id的项目

接口

```
1 GET /project/:id  
2 "Content-Type": "application/json"  
3 "Authorization": "Bearer token"
```

响应

- 成功 (200 OK)

```
1 {  
2   "id": "",  
3 }
```

POST /project/ask/:id

描述

询问该项目相关

接口

```
1 POST /project/ask/:id
2 "Content-Type": "application/json"
3 "Authorization": "Bearer token"
4 {
5     "ask": "",
6     "codeSnap": [
7         {
8             "fileName": "",
9             "lineStart": 1,
10            "lineEnd": 2,
11        }
12    ]
13 }
```

响应

- 成功 (200 OK)

流式返回

GET /project/doc/:id

描述

生成该项目相关的学习分析文档。

接口

```
1 GET /project/doc/:id
2 "Content-Type": "application/json"
3 "Authorization": "Bearer token"
```

响应

- 成功 (200 OK)

```
1 {
2     "doc": ""
3 }
```

/code

GET /code/?uid="uid"

描述

获取全部的代码生成项目的列表,可指定用户

接口

```
1 GET /code/  
2 "Content-Type": "application/json"  
3 "Authorization": "Bearer token"
```

响应

- 成功 (200 OK)

```
1 {  
2   "uid": "", //如果有  
3   "list": [  
4     {  
5       "name": "",  
6       "id": "",  
7       "type": "",  
8     }  
9   ]  
10  
11 }
```

/code/sf

POST /code/sf

描述

创建新的简单前端代码生成项目

接口

```
1 POST /code/sf  
2 "Content-Type": "application/json"  
3 "Authorization": "Bearer token"  
4 {  
5   "uid": "",  
6   "projectName": "",  
7   "message": ""  
8 }
```

响应

- 成功 (200 OK)

```
1 {
2   sfId:"",
3   "code":{
4     "html": "",
5     "css": "",
6     "javascript": ""
7   }
8 }
```

POST /code/sf/:id

描述

在id的项目中发起ai对话生成新的代码

接口

```
1 POST /code/sf/:id
2 "Content-Type": "application/json"
3 "Authorization": "Bearer token"
4 {
5   "code":{
6     "html": "",
7     "css": "",
8     "js": ""
9   }
10  "message": "",
11  "selectId":["", ""]
12 }
```

响应

- 成功 (200 OK)

```
1 {
2   sfId:"",
3   "code":{
4     "html": "",
5     "css": "",
6     "javascript": ""
7   }
8 }
```

GET /code/sf/:id

描述

获取指定id的简易前端项目相关信息

接口

```
1 GET /code/sf/:id
2 "Content-Type": "application/json"
3 "Authorization": "Bearer token"
```

响应

- 成功 (200 OK)

```
1 {
2   "sfId": "",
3   "name": "",
4   "code": {
5     "html": "",
6     "css": "",
7     "javascript": ""
8   }
9 }
```

GET /code/sf/delete/:id

描述

删除指定sf项目

接口

```
1 GET /code/sf/delete/:id
2 "Content-Type": "application/json"
3 "Authorization": "Bearer token"
```

响应

- 成功 (200 OK)

```
1 {
2   "id": ""
3 }
```

/code/cp

POST code/cp

描述

创建新的控制台应用代码生成项目

接口

```
1 POST /code/cp
2 "Content-Type": "application/json"
3 "Authorization": "Bearer token"
4 {
5     "uId": "",
6     "type": "",
7     "projectName": "",
8     "message": ""
9 }
```

响应

- 成功 (200 OK)

```
1 {
2     cpId: "",
3     "code": "",
4     "type": ""
5 }
```

POST code/cp/:id

描述

在id的项目中发起ai对话生成新的代码

接口

```
1 POST /code/cp/:id
2 "Content-Type": "application/json"
3 "Authorization": "Bearer token"
4 {
5     "code": "",
6     "message": ""
7 }
```

响应

- 成功 (200 OK)

```
1 {  
2   "cpId": "",  
3   "code": ""  
4 }
```

GET code/cp/:id

描述

获取指定id的控制台项目相关信息

接口

```
1 GET /code/cp/:id  
2 "Content-Type": "application/json"  
3 "Authorization": "Bearer token"
```

响应

- 成功 (200 OK)

```
1 {  
2   "cpId": "",  
3   "name": "",  
4   "type": "",  
5   "code": ""  
6 }
```

GET code/cp/delete/:id

描述

删除指定cp项目

接口

```
1 GET /code/cp/delete/:id  
2 "Content-Type": "application/json"  
3 "Authorization": "Bearer token"
```

响应

- 成功 (200 OK)

```
1 {  
2   "id": ""  
3 }
```
